

YUSUF ANIL YAZICI

Computer Engineer | Sarıyer, Istanbul, Turkey

+90 501 061 89 75 | yusufanilyazici@gmail.com | [linkedin.com/in/y4z1c1](https://www.linkedin.com/in/y4z1c1) | github.com/y4z1c1 | yusufanilyazici.com

EDUCATION

Boğaziçi University

B.Sc. in Computer Engineering

Istanbul, Turkey

Sep 2021 – Jun 2026

Sakarya Cevat Ayhan Science High School

High School Diploma

Sakarya, Turkey

Sep 2017 – Jun 2021

EXPERIENCE

Turkish Technology

Junior Associate Software Developer (Full-time)

Istanbul, Turkey

Aug 2026 – Present

- Develop full-stack enterprise web apps: Java Spring / Spring Boot and PostgreSQL backend, Vue.js frontend.
- Integrate SOAP web services into internal systems while holding to high code-quality and review standards.
- Collaborate with cross-functional teams to deliver scalable, maintainable software solutions.

Turkish Technology

Part-Time Full-Stack Developer

Istanbul, Turkey

Oct 2025 – Aug 2026

- Built full-stack web applications with Java Spring and Vue.js alongside university studies.
- Promoted to full-time Junior Associate Software Developer in August 2026.

RiskOptima WealthTech Corp.

Software Developer

Istanbul, Turkey

Jul 2025 – Oct 2025

- Developed algorithmic trading strategies and machine learning models for financial markets in Python.
- Built automated trading systems and risk-management algorithms for wealth-management workflows.
- Backtested strategies for performance and risk metrics; started as an intern, promoted to Software Developer.

SuiCityP2E

Blockchain Developer

Remote

Aug 2024 – Jul 2025

- Developed a play-to-earn blockchain game end to end with React, TypeScript, Node.js and MongoDB.
- Wrote Sui Move smart contracts for in-game mechanics, transactions and on-chain asset ownership.
- Owned the DevOps pipeline: deployment automation and infrastructure management.

Freelance

Full-Stack Developer

Remote

Sep 2022 – May 2024

- Delivered frontends and Solidity smart-contract integrations for blockchain NFT projects.
- Shipped responsive, cross-browser NFT minting dApps; worked directly with clients to scope and deliver.

PROJECTS

Boğaziçi Çim | Next.js, TypeScript, Supabase, Tailwind CSS, Docker, Cloudflare, Hetzner

bogazicicim.com

- Course, teacher and club reviews plus a forum for Boğaziçi University students; built solo, product to infrastructure.
- 6,500+ registered users, 18,900+ course/teacher reviews and 57,000+ forum posts across 4,300 courses and 2,000 teachers.
- Self-hosted on Hetzner behind Cloudflare, deployed with Docker and GitHub Actions via Coolify.

PlanStudio | JavaScript, three.js, Docker, GitHub Actions, Cloudflare, Hetzner

plan.yusufanilyazici.com

- 3D floor-plan tool: scan a home with Polycam, drop in the GLB, get exact per-room m² from the scan.
- Real-scale furniture placement with wall physics and a first-person walk mode; vanilla three.js, open source.

yusufanilyazici.com | Next.js, React, TypeScript, LLM streaming, Docker, GitHub Actions

github.com/y4z1c1/cvsite

- Portfolio where an LLM persona answers as me: streaming replies, rich UI cards, chat-driven theme/language switching.
- CI builds the container image and pushes to GHCR; Coolify pulls and redeploys automatically on every push to main.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, C#, TypeScript, JavaScript, Solidity, Sui Move

Frontend: React, Vue.js, Next.js, three.js, Tailwind CSS, HTML/CSS

Backend & Data: Node.js, Java Spring, Spring Boot, Django, MySQL, PostgreSQL, MongoDB, Supabase, SOAP Web Services

Infra & DevOps: Docker, GitHub Actions, Cloudflare, Hetzner, Coolify

Other: Machine Learning, Unity, Adobe Premiere Pro, After Effects, Photoshop
